

# BONE FUEL PLUS

<b>Supplement Facts</b>	
Serving Size 1 Tablet	
	Amount Per Serving
	850 mg
Daily Value (DV) not established	

## Description:

Calcium is most important minerals & it maintain healthy bones and teeth. If a pregnant women don't consume enough calcium, the baby will actually use the calcium in mother's bones. Phosphorus is important to the utilization of carbohydrates and fats for energy production. During pregnancy phosphorus is more important to the development of the fetus. Manganese is involved in the formation of cartilage and lubricating fluid in the joints and prevent osteoporosis. Boron helps reduce the loss of calcium and magnesium in the urine.
