The process of sperm production is very complex & biologically complicated procedure, during the spermatogenesis, the human body needs special agents to support the various steps of the development. A healthy male produces a few thousand sperm cells each second, about ten million each day and the process of making an individual sperm cell from start to finish takes around 9 to 10 weeks. Only the specific nutrients with a “Just Right” formula provide an optimal precondition for normal & healthy spermatogenesis..

Sperm Care is the combination of male Herbs, Amino Acid, Vitamins and minerals. It is an adjuvant preparation for male infertility. Sperm Care nurtures reproductive wellness and enhances fertility as a part of an overall health and diet regimen. The herbs and nutritional components of Sperm Care have all been Selected for their roles in promoting male reproductive wellness.”
